Subject: Public/Community Contact for West Lake Landfill Superfund Site in St. Louis, Mo.

Hi Bill,

DOE HQ referred me to the Office of Nuclear Energy for this request, and I was told that you are the Public Affairs rep for that office.

I am looking for a DOE point of contact that the Bridgeton, Mo., community/public (not media) can contact regarding the West Lake Landfill Superfund Site in St. Louis, Mo. This site contains radiological contamination derivative of the Manhattan Project and the DOE is one of the responsible parties for the contamination.

Are you the correct contact for community inquiries related to this site? If you are not, can you let me know who is? The community has been asking EPA this question for quite some time and we've not been able to answer it, so looking forward to any help you may be able to offer.

Thanks,

Benjamin M. Washburn
